SARIN LED Adjustable CCT Mirror Lights are widely used as a functional decoration for restrooms in residential and commercial spaces. What sets this mirror apart from traditional mirrors is the tempered glass. Tempered glass offers a whole new level of security versus standard glass mirrors, offering impeccable durability and peace of mind when it comes to shipping and handling.

There is a heater behind the glass to prevent fog and a switch in the middle of the mirror. The mounting plate allows you to install vertically or horizontally. Available with a frosted lens, this mirror can switch between three color temperatures, either by touch or with an optional switch.
