SARIN LED Shoebox Lights are commonly used to replace high-pressure sodium and metal halide lights to provide energy savings of up to 70%. These area lights are safe for outdoor use and are protected from rain, snow, and weak jets of water, such as sprinklers. These versions come with a pre-installed slipfitter mount, making installation even easier!

Shoebox Lights are perfect for stadiums, parks, billboards, parking lots, and office buildings. An optional photocell sensor allows the light to automatically activate at night. The lens has a glare-reduction composition that softens the light and makes it more uniform and safe to the eye. This Dark Sky compliant light eliminates glare and prevents light pollution.*

*Dark Sky compliance at 3000K
