Features

SARIN Energy is proud of its high-quality RGB Rope Light series. This revolutionary product adopts the latest technology, replacing traditional lighting with energy-efficient LEDs. These rope lights will provide improved ambience and elegance to any space. The RGB colors are changeable with the RGB controller and will allow you to add unique character to your space. The rope lights do not require a power supply, and can be easily installed by connecting to the power source, indoor or outdoor with 110V input.
