Important Note: The safeguards and instructions appearing in this page, are not meant to cover all possible conditions and situations that may occur. It may be understood that common sense, cautions and care are factors, which cannot be built into any product.The person(s) installing,operation and responsible for the light fixture, must execute these factors.

WARNING: For 120V 60Hz use only.Risk of fire and electrical shock, most dwellings built before 1985 have supply wires rated 60℃ Consult a qualified electrician before installing. If supply wires are located within 3 inchs of the ballast, use wires rated at least 90℃.

TURN OFF POWER FROM THE MAIN CIRCUIT BEFORE INSTALLING FIXTURE.

INSTALLATION STEPS

1. Tools and material needed: screwdriver, pliers,pencil, tape, wire nuts,hammer, electrical tape,8mm drill.
2. To help prevent the possibility of electrical shock, the use of rubber sole shoes is recommended.
3. Exercise care when handling the fixture to avoid cuts or abrasions.
4. If a ladder is needed, make sure to use a sturdy wooden one
5. Locate screw location according the mounting plate. for each mirror,drill holes, use hammer taping the anchoring (5X5 pieces included) all over into the wall. Screw the mounting plate onto the wall,hook the mirror onto the mounting plate.
6. Electrical connection: Make sure electricity to the circuit is turned off. Connect green/or bare copper wire to Ground screw (Ground must be properly installed or unit may not work). Connect white wire to white supply wire cover with nut/or twist together and cover really well with electrical tape. Connect black wire supply wire cover with a wire nut/ or twist together and cover really well with the electrical tape. Tuck all connections neatly into the electrical box.
7. Align the mirror backside holder onto the mounting plate so that the mirror body parallel to the wall.
8. Make sure your mirror light is fixed properly on the wall,turn power on.

Thank you for purchasing our LED Mirror!
